Title
Discrepancy
Maximum likelihood
Generalized least squares
Unweighted least squares
Scale-free least squares
Asymptotically distribution-free
Estimate means and intercepts
Emulisrel6
Chicorrect
For the purpose of computing fit measures with incomplete data:
Fit the saturated and independence models
Fit the saturated model only
Fit neither model

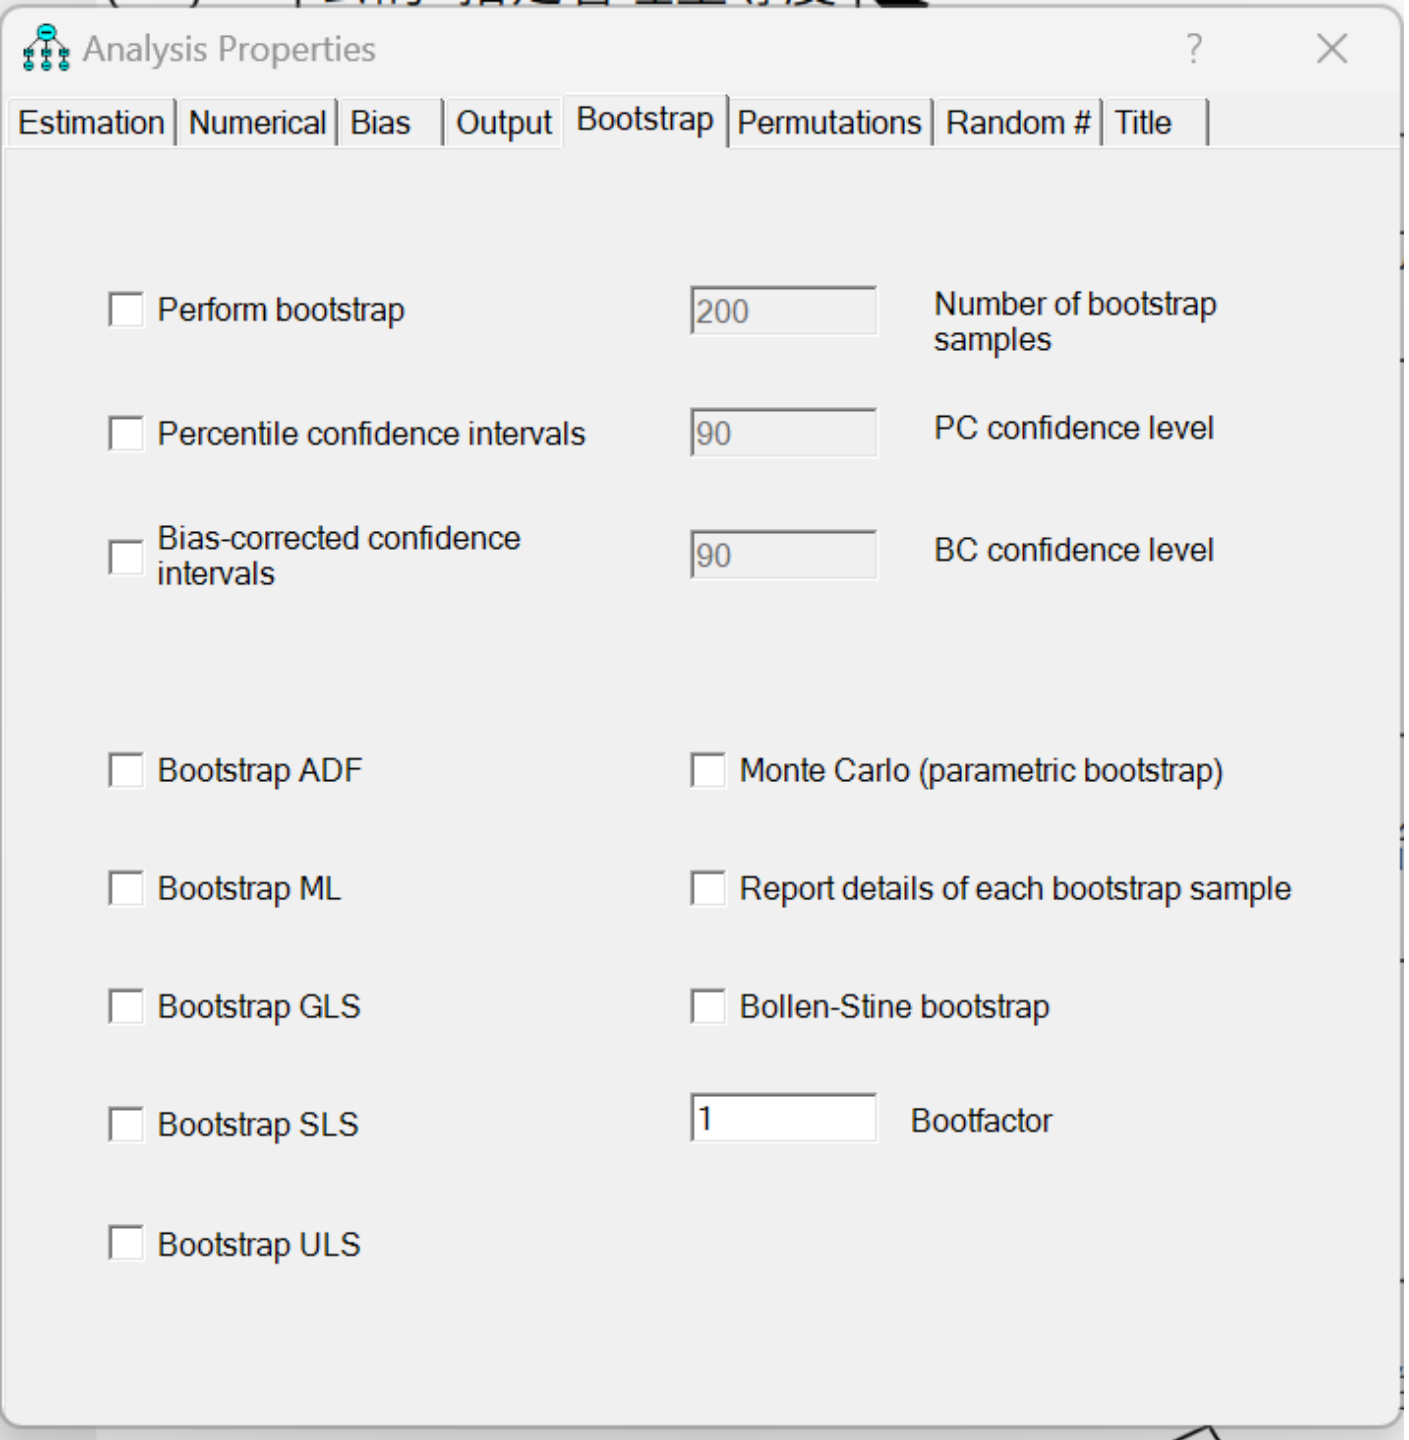

Analysis Properties
Estimation
Numerical
Bias
Output
Bootstrap
Permutations
Random #
Title
1
Seed for random numbers
Use original random number generator

Analysis Properties
Estimation
Numerical
Bias
Output
Bootstrap
Permutations
Random #
Title
Covariances supplied as input
Maximum likelihood
Unbiased
Covariances to be analyzed
Maximum likelihood
Unbiased

Analysis Properties
Estimation
Numerical
Bias
Output
Bootstrap
Permutations
Random #
Title
Convergence criteria
1E-05
Crit 1
0.001
Crit 2
200
Iteration limit
0
Number of Gauss-Newton iterations
Allow non-positive definite sample covariance matrices
Try to fit unidentified models

Analysis Properties
Estimation
Numerical
Bias
Output
Bootstrap
Permutations
Random #
Title
Minimization history
Standardized estimates
Squared multiple correlations
Sample moments
Implied moments
All implied moments
Residual moments
Modification indices
D-separation
Indirect, direct & total effects
Factor score weights
Covariances of estimates
Correlations of estimates
Critical ratios for differences
Tests for normality and outliers
Observed information matrix
4
Threshold for modification indices

Analysis Properties
Estimation
Numerical
Bias
Output
Bootstrap
Permutations
Random #
Title
Perform permutations test
Report details
All permutations
Random permutations
500
Number of random permutations

Analysis Properties
Estimation
Numerical
Bias
Output
Bootstrap
Permutations
Random #
Title
Perform bootstrap
200
Number of bootstrap samples
Percentile confidence intervals
90
PC confidence level
Bias-corrected confidence intervals
90
BC confidence level
Bootstrap ADF
Monte Carlo (parametric bootstrap)
Bootstrap ML
Report details of each bootstrap sample
Bootstrap GLS
Bollen-Stine bootstrap
Bootstrap SLS
1
Bootfactor
Bootstrap ULS
